

FEAR

rev 6/14/23

Fear is a weapon. Fear is used to control people, it is a tool of the oppressor.

The liberal left has cultivated fear for over a generation. It started in the schools and the process was to not teach “critical thinking”. Now many people don’t know how to examine what is reported and just accept what they are told. Many of the arguments today, cannot survive critical examination.

The media keep hammering us with lies and false news, and use it to turn our attention away from what matters.

We are told we emit “greenhouse gases” and it causes global warming. What we are not told is that the makeup of our atmosphere has not changed. We have not been told that the worlds volcanoes output of greenhouse gases dwarfs what man produces, and the natural Earth processes handle it just fine, always has.

We are not told the Earth was once tropical, then went through an Ice Age, and if there was no warming and climate change, we would still be in an ice age. We are not told that the climate has never... ever, been stable and never will be. We are not told that a study of global warming shows no correlation between what happens globally and what mankind does. In Ireland there is a move to kill 200,000 cows to reduce methane emissions (farts), and this is all smoke and mirrors when you consider the millions of cows being slaughtered for food.

We are told Ice is melting and sea levels are rising, yet no clue how sea level is measured. Since all ice is created from sea water, when melted it goes back to the sea, there is no new source of water that is not already here, no new water.

Now a British report says the weight of cities near the coast, is causing them to sink. Even numbers in the millimeter per year range are quoted. Not revealed is how this is measured, and even if true, to sink a foot might take a thousand years and I am sure old buildings would be torn down and new ones built further back from the rising water... if that were real.

I have read that the moon is slowing moving away from the Earth, about one inch a year. How is that measured? If true then in 1,000 years the moon would be 1,000 inches further away and what difference would it make anyhow (83 feet)? The moon is not in a fixed circular orbit anyhow and the distance controls our weather and tides as it changes back and forth in a regular cycle. It may not be widely known but our months are determined by the moon cycle, 12 cycles a year.

We are told to drive electric cars to reduce pollution, but not mentioned is the power has to come from somewhere and the pollution issue is just shifted to the power station. We are told in one breath to get rid of gas stoves, gas water heaters, gas cars and go electric, yet in another breath to not use our air conditioners to save power. To support all electric cars will require many more power plants. I am reminded that for every cause there is an effect... nothing is free. Solar Power looks good but a Solar Panel is only good for maybe 25 years until the output becomes so low they must be replace, and recycling of the panels is a real issue. New panels need Silver and the lack of supply of needed silver is slowing production. There is a huge, rapidly growing backlog of old Solar Panels that need to be recycled to recover Silver, Copper, Aluminum and other materials, and

the scrap mountain is rapidly growing as old panels wear out and are replaced, and the demand for new solar panels is exploding, as the use of Solar power expands.

Environmentalists want to close mines but ignore the fact that without mining, batteries and electric automobiles can't exist. Without petroleum almost all modern life goes away, starting with plastic in its many forms.

We were told we had a COVID Pandemic. Governments and politicians used the fear to grab money and power. Numbers were inflated. Pharmaceuticals raked in billions of dollars as the government tries to force everyone to get worthless shots, boosters, and no doubt get huge political donations back from the Pharmaceuticals. In fact COVID is a flu, like goes around every year. It has been scientifically found that getting "the jab" is more dangerous than not getting it. There has been a few attempts to start another 'pandemic' (like Monkeypox) but people are sick of pandemics and simply ignore the bait and fake news reports. The latest effort is fear reporting of a new virus "X". It is called "virus X" because it does not exist, but we are expected to act like it does... and be afraid.

On to other things. It is a scientific fact that all living plants and animals, including humans, have two sexes, male and female, X or Y chromosome. One does not get to decide what sex to be, you are what you are. No amount of surgery will change your sex. Yet this issue is being forced on us to cause division among various groups. Like in the classic movie (The Wizard of Oz) we are told "do not look behind the curtain"... it is just a tool to divide us and weaken society to make it easier to control. I read a report that found 80% of those that were surgically modified, when they become full adults want to become their real sex but what has been done cannot be undone and neither sex can produce children as their sex organs have been destroyed.

Racism is maintained by the government. We are all divided into groups and pitted against each other. Racism would go away if we stopped tracking people by race. If all we had were people, soon color or race would be forgotten, there would just be people and all of us are different. I know a lot of people, some are good friends and others not so much, yet the color of skin or where they are from holds no meaning, I just know the person.

The family unit has been badly damaged, and Religion is, by the media, only shown in negative light. Godly people are made to look like mentally ill fools, and churches as relics of the past, led by 'leaders' who are living off of the church members who give misguided support. It is all part of the move to destroy the family, and our society.

What is to fear are the leaders that are dividing us, pitting us against one another, and destroying our society so 'they' can control the pieces... power and wealth is their goal.

Meanwhile I live my life, and mostly ignore the news media. My life has not changed, People are born and die and the death rate has not increased (ignore the published fake numbers). Most who were reported as death because of COVID would have, and maybe did, die with COVID not being a factor. Hospitals received funds for every 'reported' case of COVID so in some hospitals *everyone* was reported as having COVID.

I never wore a mask (they are worthless against a virus) beyond where it was enforced, never got a shot, never got COVID or if I did it was so mild I quickly got over it without seeing a doctor. The only COVID deaths I have seen were elderly persons already dying of something else, like cancer.

In short, as far as I can tell, the COVID pandemic was mostly hype and government overreach. The only reason the “pandemic” ended is because people got sick of it and said NO MORE and returned to normal life. The shots and endless booster do no good, but feed huge sums of money into the political system (and the money comes by adding to the national debt). It is money laundering where politicians pass laws, (everyone must get the shot) then take appropriated money and by adding to the national debt, and channel huge sums to the Pharmaceutical companies who in return kick-back a portion to the politicians in the form of donations. Everybody at the top gets richer while the National Debt rises out of control.

Christianity tells us to “do not be afraid” but to trust in the leading of the Lord. As Proverbs 3:6 says; “in all of your ways acknowledge Him and He will direct your paths” and I have found this to be true. I do not have to worry, I have no fear. I find Romans 8:28 is true; “for we know that all things work together for good for those who love the Lord and are called according to His purpose.” We fix our eyes on Jesus and we are not blown around by the winds of the world. We have an anchor and are not fooled by the schemes of the world. I testify to this fact... no fear, no worry, and death holds no fear either. As the apostle Paul said; “for me to die is gain”. First accept this then learn over time that the Lords leading is real.

Make no mistake though, the real battle, when all is stripped away, is good against evil, and Satan is waging war against God. This has all been foretold and is happening right before our eyes.

Choose this day who you will serve, but for me any my household, we will serve the Lord... and have NO FEAR.

Here are a few things to help you avoid the traps:

1- don't read any article that headlines a question; could happen, may happen, what if; all they do is plant seeds of suspicion and doubt.

2- racial stories that divide people into groups.

3- science claims from unidentified self-appointed “experts” that use numbers and statistical data yet give no clue how those numbers were generated.

4- realize that in a world that has abandoned right and wrong... a moral code, when it comes to the mass media truth is not a factor. What is published is what the people behind it, want you to believe. Much of it is made up, fake news.

Don't believe anything at face value. Examine everything with critical thinking. Nothing is true because someone says it is. Look at the evidence.

One example “the water level of the ocean is rising”. Ask; how was that measured? Where did the water come from? [melting ice]. Where did the ice come from? [rain/snow/cold]. Where did the rain and snow come from... and follow the chain back to the ocean. Conclusion, there is no new water. The water cycle is a closed loop.

In all of the history of Earth, the climate has never been static and stable. In human terms change is very slow, but continues, and we adapt to whatever the conditions are.

Don't just accept what is said, look behind the curtain.
